

User Stories:

THE BIG GOAL

As a user of Rent-It, I'd like to be able to browse what people near me are offering up for rent. The core of rent-it is that every item must be rentable. It is optional to rent-to-buy, or to be able to buy an item, but every item must be rentable.

we don't really need to separate sellers from renters (terminology already confusing enough) everyone is a user that could also be a seller or a renter. so each story can be "as a user offering items for rent" or "as a user renting an item..."
